

Get At Me

Broadway Calls

So get at, get at me
I've been waiting anticipation it's driving me crazy
I've been dying all night long
For this cadence to find a way to my heart
Pick me back up and drop me back off at the start
I've been dying all night long
This only goes so far before we break our hearts
Reacting, reacting to our loneliness
Too late, a little too late
Till we just give in and seal this fate
Reacting, reacting to our loneliness
Overreacting
I get carried away with you
I wanna smuggle you across daylights
And break the light and make you all mine
She never asked me but I promised not to tell
I never dreamed a night could go so well
It's so hard to keep this to myself
Cause I remember everything
