

# Baby Don't Go

Brother Ali

Hey little honey bee. Haha. You look like you were looking at me  
I was standing over here. Naw. You wasn't looking at me?  
Well what were you looking at then? I know that you weren't looking at  
nobody around me  
Yeah, come over here. Lean a little bit closer  
Let me tell you something in your ear

Baby don't go I know you're listening  
But you gotta try to play your position  
Fallin' in love and you won't admit it  
We're only livin' come on and risk it

Baby girl I ain't easy on the eyes like the rest of them boys  
And I don't spend a months pay check on my clothes  
But when you in the bed with the pillow under head  
Who you really want to get up and check on that noise?  
Got a permanent feather in my cap  
Got a stretch in my stride, a stroll to my step  
Realizing that it's all about the mindset  
Get a little closer the older I get  
Wear a ticklish grin on my chin  
The good Lord put me in this particular skin  
When He speakin' to the angels, I be listening then  
And I show an inside joke with all of them  
I'm high without smoke  
Shine without a rope  
I am the old, step outside when I am broke  
They always crowded around me when I spoke  
Because every time I start rhymin' it's a quote  
Leave it to me to see the diamonds in your coal  
Holler at the glow from the bottom of my soul  
Ain't no need to polish it no more  
Baby let your guard down and let your heart go  
Girl

C'mon and just throw your knees in the air for me baby  
Tremblin' like you just might care for me baby  
Say hell yeah  
Good till you say hell yeah

I'm saying. I came all the way over here  
I done laid myself out. The least you can do is dance with me. C'mon
