B-b-b-baby, I-I-I-I can't wait, your love B-b-b-baby, I-I-I-I can't wait
```

Wait, wait, I done tumbled into love again Ladies first, safety last, nothing under him Watch it crumble then, build it up again Long kiss, good fright, you let it tuck you in Nothing other than, human suffering Let your frozen bones shutter in the summer wind Crash test dummy friend turned up to ten Loves riding shotgun, never buckled in Make your blood rush so percussively That you don't adjust to see the drum's new custody Running full tilt faceless Eyes wide you collide through that plate glass Straight smash, open wide, gaping gash Make this the last time that you late for class Step in, effect like Armageddon I thought by now you'd learned your lesson

B-b-b-baby, I-I-I-I can't wait, your love B-b-b-baby, I-I-I-I can't wait, your love Baby Your love Baby
