

Blow The Spot

Bubbles

It's getting hot we blow the spot!

Party's getting started, lights are getting low
Something is about to explode
Souls are shaken
And hearts are taken around you, yeah, yeah

Come a little closer and moving to the vibe
Show me that you're up for the ride
The bass is pumping
And people jumping around you, yeah, yeah

So you got what it takes
Can you handle the case?
Then everything will be alright
Everybody's going
Down! Down! Down!

Bouncing getting it on to the music
We blow the spot
Bouncing, making it right while we crusing
It's getting hot we blow the spot!

Cranking up the level, speeding down the lane
Everybody's going insane
All the girls are flying
And the boys are trying around you, yeah, eh

Making our connections, talking through the eyes
Knowing that tonight is the night
And it feels so good
Like I know it would around you, ooh ooh ooh

So you got what it takes
Can you handle the case?
Then everything will be alright
Everybody's going
Down! Down! Down!

Bouncing, getting it on to the music
We blow the spot
Bouncing, making it right while we crusing
It's getting hot we blow the spot!

Swing it, shake it
Sliding to the left
We're moving and kicking
Sliding to the right, come on

So you got what it takes
Can you handle the case?
Then everything will be alright
Down! Down! Down!

Bouncing, getting it on to the music (to the music)
We blow the spot
Bouncing, making it right while we crusing

It's getting hot we blow the spot!

Bouncing, getting it on to the music
We blow the spot (we blow the spot)
BUBBLES making it right while we crusing
It's getting hot we blow the spot!
