It's getting hot we blow the spot!

Party's getting started, lights are getting low Something is about to explode Souls are shaken And hearts are taken around you, yeah, yeah

Come a little closer and moving to the vibe Show me that you're up for the ride The bass is pumping And people jumping around you, yeah, yeah

So you got what it takes Can you handle the case? Then everything will be alright Everybody's going Down! Down! Down!

Bouncing getting it on to the music We blow the spot Bouncing, making it right while we crusing It's getting hot we blow the spot!

Cranking up the level, speeding down the lane Everybody's going insane All the girls are flying And the boys are trying around you, yeah, eh

Making our connections, talking through the eyes Knowing that tonight is the night And it feels so good Like I know it would around you, ooh ooh ooh

So you got what it takes Can you handle the case? Then everything will be alright Everybody's going Down! Down! Down!

Bouncing, getting it on to the music We blow the spot Bouncing, making it right while we crusing It's getting hot we blow the spot!

Swing it, shake it Sliding to the left We're moving and kicking Sliding to the right, come on

So you got what it takes Can you handle the case? Then everything will be alright Down! Down! Down!

Bouncing, getting it on to the music (to the music) We blow the spot
Bouncing, making it right while we crusing

It's getting hot we blow the spot!

Bouncing, getting it on to the music We blow the spot (we blow the spot)
BUBBLES making it right while we crusing It's getting hot we blow the spot!
