

I Have A Dream

Bubbles

Every night I look up into the sky and search for a moving star
I have a dream
That I dream every night
I look out my window
C'mon and let us go
Oh oh oh oh I have a dream
You can ask if I believe in heaven
You can tell me that we're going to Mars
I'm just a little girl in a big big world
It doesn't take much to make me happy
In a little while we're giving you a smile
C'mon and fly with me
I have a dream
That I dream every night
I look out my window
C'mon and let us go
Oh oh oh oh I have a dream
I'm too young to think about tomorrow
Life is full of magic every day
I'm just a little girl in a big big world
All I wanna do is make you happy
In a little while we're giving you a smile
C'mon and fly with me
I have a dream
That I dream every night
I look out my window
C'mon and let us go
Oh oh oh oh I have a dream
That I dream every night
Life is a fantasy
Be what you wanna be
Oh oh oh oh I have a dream
Every night I look up into the sky and search for a moving star
I close my eyes and wish I was with you take me to the place where you are
I look out my window
C'mon and let us go
Oh oh oh oh I have a dream
That I dream every night
Life is a fantasy
Be what you wanna be
Oh oh oh oh I have a dream
That I dream every night
I look out my window
C'mon and let us go
Oh oh oh oh I have a dream
