

## Where The Ending Starts

Bucks Fizz

You've been letting me down lately  
It seems that we're always apart  
Is this just a phase that we're going through  
Or is this where the ending starts?

I can't stand losing what's left between us  
So tell it to me straight from the heart  
If the feeling's gone, then we can't go on  
And this is where the ending starts

Maybe the love just slipped away  
Without us ever knowing how  
'Cause we used to be going such high places  
Where we goin' now?

All I want is to be beside you  
And it'll hurt if this all has to end  
We've been together so long, tell me what went wrong  
We were lovers once but now just friends

Remember the warm nights wrapped in love  
It seems like only yesterday  
When it used to be easy talking to you  
Now words get in the way

My life can't ever be right without you  
My future's falling apart  
You say the love we had is just a memory  
And this is where the ending starts
