Save Me

BulletProof Messenger

Dreams fall to wasteland
And it leads me to say
Our silent screams are far from helpless
And there's no time to change

Give me something to save myself
I can't change into someone else
Give me something to ease my pain
Do we all have to be the same
I won't let the world pass me by
But I know that at least ive tried
Save me from this life

So far I've wasted time to hear your case
I choose to fight for our wasteland
And you choose to walk away

Give me something to save myself
I can't change into someone else
Give me something to ease my pain
Do we all have to be the same?
Give me something to save myself
I can't change into someone else
Give me something to (3x)
Change
