

## Blind Eyes

### Buried In Verona

Believe in me like I'm never gonna fall in the first place  
Tied down like I'll never run my own race  
Fuel feeds the fire I got desire  
But they're never gonna let us have our own space  
If you're never gonna beat them then u gotta join them  
The only problem is holding back a beating for em  
The world is a gift and I dream to live  
Always getting held back by a mistake  
And I know in my heart where gonna keep trying  
One day it's gonna be us on the flip side  
Cause it's in the end that the future bends  
Hard work pays off with the dividends so  
Believe in me so I can show you the way

Bled this whole world dry  
Follow the cash and you'll find the cause  
Bled this whole world dry  
Minds on the dollar all emotions are gone  
Bled this hole world dry  
This is so hard to watch

Believe in me you wanna see how far we can take this  
You're never ever gonna show me where the path ends  
Just hard when you're stopped in your tracks by  
Someone with a grudge and fucking a bad eye  
Are they misinformed do they just ignore  
All the times that we fought to get us this far  
And I know you gotta give it all  
For the top spot  
Think I'll never break free and get the chains off  
You got the keys that we all need  
I guess success is only measured when your hands bleed  
These scars tell a story of what made me so  
Believe in me so I can show you the way

It's written on the wall it's written on your face  
There's something more to this you're taking to the grave  
Wish I knew so that secret could be saved  
We live once so set us free
