

Extraction

Buried In Verona

I can't breathe
Suffocating
Just loosen the noose
You give me no reasons
So fuck your excuse
I'm tired of you
Breaking me down
I'm losing the fight
The only way out is to get to the light
I'm so sick that I'm embracing
The end
This is what you wanted
Pushing and pulling
Till limbs start departing
I fracture, I'm bleeding within
No one can see that I'm drowning from sin
Now breathe
Now breathe me in
I've got this noose around my neck
Reminds me of the time I have left
I need to do this on my own
'Cause I was meant to be free so just leave
Colliding
Our worlds caving in
Too bad the tunnels were dug from within
I can try piece back this puzzle
If only the pieces weren't dead from the hollowing out
I've got this noose around my neck
Reminds me of the time I have left
I need to do this on my own
'Cause I was meant to be free so just leave
Extract me, get me out
I'm sick of the ghosts that are dragging me down
Extract me, get me out
The anchors and chains only scarring me now
Extract me, get me out
The target is burning a hole in my back
Extract me, get me out
If this is called living then stop my heart
