

Second Star To The Right

Bury Your Dead

Her blue eyes grey in the shadows
Making changes for tomorrow
Her fear let's another day go by
Where stars fall dreams die

I know she's suffering
And pursuing what went lost
You're fucking wasting away
Skies only tell the tales of
Dreams that are lost

I wrote that to you everyday
She never came
My faith in humanity died
Calling out her name

I wrote that to you everyday
Shit never changed
My faith in humanity died
Calling out her name
