

# Nurse

Bush

First the head comes around  
Then the heart can be found  
Better wait until then  
To understand everything

Simple life  
Simple days  
Sunshine sideways

I think of you like an angel  
I think of you like an angel

I have fallen into you  
I need a nurse  
To get me through  
All of my injuries  
All of my injuries  
May the light be always over you

Oh Sister Rose  
She got it all  
She knows  
Oh Sister Rose  
Strawberry love  
Overload  
There she goes  
Sister Rose

I think a dream really can save  
I know that you love like craze  
Fire girl  
Queen of heat  
You're dynamite on Mercy Street  
One kiss  
One way  
I don't care what anyone says  
I think of you like an angel  
I think of you like an angel

I have fallen into you  
I need a nurse  
To get me through  
All of my injuries  
All of my injuries  
May the light be always over you

Oh Sister Rose  
She got it all  
She knows  
Oh Sister Rose  
Strawberry love  
Overload  
There she goes  
Sister Rose

Oh Sister Rose I'm falling  
There's a light that never goes out
