## **The Chemicals Between Us**

I want you to remember A love so full it could send us all ways I want you to surrender All my feelings rose today And I want you to remain The power of children can amaze I'll try not to complain I know that's a pisser baby

The chemicals between us The walls that lie between us Lying in this bed The chemicals displaced There is no lonlier place Than lying in this bed

I want you to remember Everything you said Every driven word Like a hammer, hell, to my head

The chemicals between us There is no lonlier place Then lying in this bed The chemicals displaced There is no lonlier place Than lying in this bed

The chemicals between us The chemicals between us Lying in this bed

We're of the hollow men We are the naked ones We never meant you harm Never meant you wrong I'd like to thank All of my lovers, lovers, lovers

The chemicals between us The army of achievers Lying in this bed The chemicals displaced There is no lonlier face Than lying in this bed

The chemicals between us The chemicals between us The chemicals

The chemicals between us
