

Hands on Me

Cam Meekins

I've been living on the road, got these Vans on me
I've been sticking to the code while you ran from me
They've been tryin' to bring me down with that energy
I don't ever ever let 'em put their hands on me
I've been living on the road, got these Vans on me
I've been sticking to the code while you ran from me
They've been tryin' to bring me down with that energy
I don't ever ever let 'em put their hands on me

I been tryin' to figure out how I feel
Tryin' to chase a million dollars, I been countin' them bills
All these people breaking promises, I'm keepin' it real
I flick that joint out of the window, and I tell her: "Let's chill"
I get out, and no one understanding me still
And can't understand the pain of being stuck in this hell
I wan't a job for all my dawgs and my records to sell
So I just keep my faith in God, and I ain't never gonna fail

I've been living on the road, got these Vans on me
I've been sticking to the code while you ran from me
They've been tryin' to bring me down with that energy
I don't ever ever let 'em put their hands on me
I've been living on the road, got these Vans on me
I've been sticking to the code while you ran from me

They've been tryin' to bring me down with that energy
I don't ever ever let 'em put their hands on me

I've been driving with no license with these grams on me
I've been tryin' to figure out what my play gon' be
I just had to make it, had to escape the depression
Man, all this social media got my mind really stressin'
My family in that operation had me countin' my blessings
Now I'm just tryin' to make these memories 'cause time's of the essence
The only time I feel okay is, when I be blazing that essence
Can't be around too many people, 'cause they don't get the message
But we gon' be okay, if you stay with me girl
And we gon' live everyday, because it's really our world

I've been living on the road, got these Vans on me
I've been sticking to the code while you ran from me
They've been tryin' to bring me down with that energy
I don't ever ever let 'em put their hands on me
I've been living on the road, got these Vans on me
I've been sticking to the code while you ran from me
They've been tryin' to bring me down with that energy
I don't ever ever let 'em put their hands on me
