

## Two Of Us

Cameo

How many times have you looked outside  
Sun shining bright  
And you thought to yourself  
Hey! Lovely lovely day

Well that happy day will be no more  
Cause some of us are hungry and even more poor  
You've got to get involved, get involved  
The almighty is there to see, yeah

You've got company -  
You've got to help one another  
Cause we're all one  
He's watching two of us by two of us  
He's with us every day  
With us in every way

How many times have you looked around  
And found someone in need  
Then you pushed them aside, pushed them aside  
Considering yourself a fair person indeed

You see the news, it's no good news  
The less fortunate people are still paying dues  
Come on and stand up straight  
The suffering won't wait  
There's only one world for us to share  
Yeah

He's with us every day in every way  
He's watching two of us by two of us  
He's watching two of us by two of us  
He's watching two of us by two of us  
He's watching two of us by two of us  
He's watching two of us by two of us

He's watching, yeah  
He's watching  
He's watching  
He's watching
