

Dancing Through Hell

Cancerslug

I guess things could always be worse
But not very much
You send me away with a curse
But if you wanna hear me beg
Well, you're shit outta luck

Burn me down, baby

Dance, dancing through hell
I don't see no reason why I can't enjoy myself
Dance, dancing through hell
If these fires keep rising, well we might as well
Might as well dance

Your kiss is like poison, we're both born to burn
Your memories torture, why haven't I learned
Demons fall from your face when you cry
And I still believe when you sing me your lies

Dance, dancing through hell

I don't see no reason why I can't enjoy myself
Dance, dancing through hell
If these fires keep rising, well we might as well
Might as well dance

Feel like I'm shaking alone on the dark
I'm covered in wounds like some crucified God
And I don't have to wait for no music to start
'Cause I've got the beat of my own angry heart

And I'm dance, dancing through hell
I don't see no reason why I can't enjoy myself
Dance, dancing through hell
If these fires keep rising, well we might as well
Might as well dance
