Cancerslug

Easy, just take it easy
You know I'll never ever leave you alone
I know you need me
But just take it easy
I've been right by your side all along

I'll take you home
Come into the darkness, we need no light where we go
I'll take you home
Come back to the darkness, we both know where we belong
I'll take you home
I'll take you home
I'll take you home

Yeah the ending is coming
But I won't let your eyes be burned by the light
So just bury your sweet face in my chest
And I will carry you on as I run through the night

I'll take you home
Come into the darkness, we need no light where we go
I'll take you home
Come back to the darkness, we both know where we belong
I'll take you home
I'll take you home
I'll take you home
I'll take you home
Come into the darkness, we need no light where we go
I'll take you home
Come back to the darkness, we both know that we belong
I'll take you home
I'll take you home
Right back to the place where you came from
Yeah, I'll take you home
