

## Road To Hell

Cancerslug

Even if I hated you this morning  
It don't mean I won't love you tonight  
This is your last and final warning  
Nothing again will be alright

For you and I are on this road to Hell  
Relax and let it burn  
Your fear and pain now are setting like the sun

Even if killed you this morning  
It don't mean I can't f\*ck you tonight

Even if your skin is cold and boring  
I'm still turned on by the fear behind your eyes

For you and I are on this road to Hell  
Relax and let it burn  
Your fear and pain now are setting like the sun

You and I are on this road to hell  
Relax and let it burn  
Your fear and pain now are setting like the sun
