

Sassy For Satan

Cancerslug

Don't worry my love, you are not forsaken
I'm with you Sassy for Satan
Dancing to the sound of apocalypse

We'll watch them as their children die
I see you laughing when they cry
And I know that we will burn better than the rest

Sister lucifer bring me a dream
Let me bleed on your wings
It ain't much but is more than we had
When all that we had was our pain

My love you're not forsaken
I'm with you sassy for Satan
Burning in this hell we call our home

If ever longing fills your eyes
I'll pull the gods down from the sky
And lay them at your feet until its gone

Sister lucifer bring me a dream
Let me bleed on your wings
It ain't much but is more than we had
When all that we had was our pain

Sister lucifer bring me a dream (bring me a dream!)
Let me bleed on your wings
It ain't much but its more than we had
When all that we had was our pain
