

## Seasons of Sickness

Cancerslug

Seasons of sickness are all that I found here  
Paint the windows black, don't let any other light in

I'll wait for you  
Set the world on fire and watch it burn  
And when we're through

Seasons of sickness are all that I found here  
Paint the windows black, don't let any other light in

I'll wait for you  
Set the world on fire and watch it burn  
And when we're through  
Staying warm in the endings of our victims

The time has come for the world to expire  
We'll hear their screams as they twitch in the fire!
