

# Taking the Knot

Cancerslug

When the nights cold  
Angels will fall  
All up and down this lonesome highway

There is blood on the street  
We ain't got nothing to eat  
And if you're not riding with me, you're in my way

If this dogs on your trail then you know you'll be caught  
If you get in my way  
Then you're taking the knot

You gave me your heart, but I left it to rot  
My love is a beast  
Now you're taking the knot

f\*ck all of you  
Walk a mile in my shoes  
They are full of needles, broken glass, and razorblades

The days are all the same and the nights are filled with pain

And if you're not riding with me, you're in my way

You stood up to me like some f\*cking big shot  
Then left here in tears after taking the knot

Some find out that they aren't as tough as they thought  
You came for a fight  
Now you're taking the knot

When the nights cold  
Angels will fall  
All up and down this lonesome highway

There is blood on the street  
We ain't got nothing to eat  
And if you're not riding with me, you're in my way

Our instincts are for violence and animal lust  
Our flame burns a moment then we return to dust
