

Unholy Light

Cancerslug

In the darkest pit of hell, I can see your light
It's burnin' from the pain you feel inside
Tears of blood are flowin' from your eyes
Cause sometimes death seems easier than living

The world only seems dark
Cause it's eclipsed
Under a goddess like you

Even demons get a little sentimental sometimes
I know the loneliness you're feelin' cause it's so much like mine
The sun is finally settin' on the angel you are

The night time is the home for every star

The world only seems dark
Cause it's eclipsed under
A goddess like you

So what are you gonna do
You shine on
Unholy light
Unholy light

Spread your wings and show
The world how you fly
With unholy light
Unholy light
Unholy light

Satan blessed you with the gift of his fire
So shine your unholy light
