

## Loss Of Words

### Career Soldiers

We've been fooled again with smoke and mirrors  
They'll question your safety and play on your fears  
Same old game of wrong vs. right  
Same old hook that again we bite

You think we'd learn, but it just gets worse  
I'm at a loss of words  
A voice of reason will never be heard  
I'm at a loss of words

History repeats itself  
Armageddon, straight to hell

Different players but the same game  
Same script with different faces and names  
The poor die while profits are gained  
Real people suffer and are left with the pain  
It's an endless war with no peace in sight  
We always need an enemy and evil to fight  
Rallying patriotism and silencing dissent  
A flood of propaganda to forget our discontent

I don't think we'll ever understand  
War can never bring peace  
It's an endless cycle of hate  
Creating new enemies

Our blood, their blood, it's just as red  
Just or unjust, innocents are just as dead  
We've seen it before and I'll tell you what's next  
More pain, more lies, and more death
