How I See It

Carina Round

You know it seems to me You fail to see beauty through invisible tears I know what you mean but Its not what I'm getting at when I say 'The bits of broken glass In the evening sun reflection Look like stars in the night sky Of the central reservation'

You just say 'That's not how I see it'

Moving through the rain I hear you here Say life is a valley of tears And your heart is a drain But how can that be the truth when The storm that came was invited by you?

I say

'The rain is just the moon She's sending soul in your direction I hope she softens you soon With her subliminal affection'

You just say 'That's not how I see it'

There's something missing when you look at me If all you see is what your eyes see Hold on I'm coming in
