## **Christmas in the Air**

## **Carole King**

Christmas time in the middle of a city Seeking its salvation With every string of lights That suddenly appears

Children stare with new found wonder No one dares to break the trance Every wish is carefully numbered And god has granted all a second chance This day

And all at once
The dream's begun
And as we mark the old year's passing
Strangers greet
On every street
And suddenly there's goodwill everywhere
There's Christmas in the air

On this night
To this light
We see it all again
On this night
To this light
We see it all again

On this night
To this light
We see it all again
On this night
To this light
We see it all again
All again

On this winter night We still wait for you

And now the time has come
When all the world is one
And as we mark the old year's passing
Strangers greet
On every street
And suddenly there's goodwill everywhere
There's Christmas in the air

There comes a time when we're on our own Some times in life such a thing must be But such a thing should not be known This night This night

And now the time has come And now the time has come

And all the world is one
And as we mark the old year's passing
Strangers greet
On every street
And suddenly there's goodwill everywhere
There's Christmas in the air

The final letter that she read Was from a younger man It came with a journal That was all written by hand

He had done something so wrong in life That he no longer wished to live But on this night he had a dream And found that god forgives

If we truly regret how others we have hunt He will understand So he took the message from this night And became a different man
