## To Love

**Carole King** 

Down the road a piece he was waiting Yes, he was waiting and you know me I had had my fill of hesitating And I always knew it had to be

To love, to love, to love, to love All you need's the opportunity To love, to love, to love, to love Baby don't you make a fool of me

I never will forget our first encounter Yes, I'm proud to say that it was all right And I was so glad that I had found him As ready as I was that night

To love, to love, to love, to love All you need's the opportunity To love, to love, to love, to love Baby don't you make a fool of me

There are those of us too cool for passion They're the ones that it could do some good And there are those who say it's out of fashion They're the ones who only wish they could

To love, to love, to love, to love All you need's the opportunity To love, to love, to love, to love Baby don't you make a fool of me

Baby don't you make a fool of me Baby, don't you make a fool of me Baby, don't you make a fool of me Baby, don't you make a fool of me
