

The Day That I Die

Case

We've been friends
For as long as I can think
But I realize now
I need more, ooh
And right now
As you cry in my arms
I know that you're the one
I've waited for, oh

Until the day that I die
You don't ever have to cry
You know I'll always be right by your side
Until the day that I die
You don't ever have to cry
I'll change the way it rains and make you smile

No, no, no, no
You say you've been hurt
But it's all a game we play
Going 'round and 'round in love
With no foundation oh
If we just try to forget the bad
Then our love will last forever, hey, hey, hey

The times you are down and out
I will be the only one you care about
You know you have a friend in me
On your coldest day and darkest night
I'll be the one who's there to make it bright
I'll do anything to make you feel secure
Baby our love
Our love will last forever
I'll give you my heart
I pray we'll stay together
Till death do us part
I want you to remember
Please don't break my heart
Never leave me lonely
Baby I want to love you only
