

You Just Don't Know

Case

It's a different world
Ever since I saw your face
My mind is in a world
Cause like a hurricane, you came on day
And it took so long just to know your name
Life is different now cause you're in my life
All the pain I've known, it was worth the fight
Cause I got big plans for you

I wanna give the world to you
I wanna lead you by the hand
You just don't know, little girl
And with you I'm born again
With me you've always got a friend
And I protect you from the world
You just don't know, little girl

So unusual that I'm feeling what I feel
Doesn't even matter how
How much near to learn, sure we'll get it right
Sometimes you need some help to get you through your life
I got that love you need, I be that book you read
Got so much to do, so baby chill with me
Cause I got big plans for you

I wanna give the world to you
I wanna lead you by the hand
You just don't know, little girl
And with you I'm born again
With me you've always got a friend
And I protect you from the world
You just don't know, little girl

It was raining, now that you're here the sky is blue
Cause when I look at you, the sun shines on my life
We'll have our ups and downs, our ins and outs
Nothing perfect girl, let me show you how
People fall in love
God has chosen you, way to make it now
Walk a thousand miles, so I could give the world to you
I'd do anything for you

I wanna give the world to you
I wanna lead you by the hand
You just don't know, little girl
And with you I'm born again
With me you've always got a friend
And I protect you from the world
You just don't know, little girl

Can't wait to talk to you
You just don't know little girl
Whenever you need me, you can count on me
Need you, need you, need you
You just don't know little girl
