

You

Case

Baby, it's more than just a melody
It's personal with you and me
And the end of the day it's all for baby, only my baby
Baby tell me, who do you love?
Who do you trust, when it all falls down
More than just a confidant
I'll be your soldier holding you down
You'll be the one I die for
My prototype for love

Tell me can you see it
There is a ribbon in the sky for our love
Tell me can you see it, see it yeah
And watch the stars collide for our love
I was walking around lost but you saved me
Can't nothing take me away from my baby
Oh no no no

It's all about you you you
It's all about you you you
No matter what they say about you
It's all about you you you and your love

It's as simple as 1, 2, 3
When it comes to you and me
If I'm stressing then she will rub my back
She's working all day I'll rub her feet
Oh that's what a man do
I may be strong but my girl makes me powerful
And according to her the feelings mutual

Tell me can you see it
There is a ribbon in the sky for our love
Tell me can you see it, see it
And watch the stars collide for our love
I was walking around lost but you saved me
Can't nothing take me away from my baby
Oh no no no

It's all about you you you
It's all about you you you
No matter what they say about you
It's all about you you you and your love

It's all about you
No matter what they say baby
Now that I found you
I'm in heaven but you saved me
Oh my baby

You and your love
I was walking around lost but you saved me
Can't nothing take me away from my baby
Baby oh no no no

You you you
It's all about you you you

No matter what they say about you
It's all about you you you and your love
