

# Everything

Casey Abrams

I think about you sometimes  
You think about me too  
But baby, it's something we can do, yeah  
If you wanna dance around it  
We can dance all night and day  
We can do whatever you say

And I know that you want me  
To do the thing that you like to  
Your body and mind

Everything, everything is gonna be alright  
If you want it to  
Everything, everything, everything is gonna be alright  
Everything, everything is gonna be alright  
If you want them to  
Everything, everything, everything is gonna be alright

It's so plain and simple now  
I wrote all these songs about you  
Those lyrics blowing my mind  
I know that I'm thinking  
About all the things  
But I know that you will come in time

Everything, everything is gonna be alright  
If you want it to  
Everything, everything, everything is gonna be alright  
Everything, everything is gonna be alright  
If you want them to  
Everything, everything, everything is gonna be alright

Everything, everything is gonna be alright  
If you want it to  
Everything, everything, everything is gonna be alright  
Everything, everything is gonna be alright  
If you want them to  
Everything, everything, everything is gonna be alright
