## **Desert Drought**

even if you work it out the problem still remains just like a d esert drought the remedy remains intact but falls apon deaf ear s that refuse to react oblivious to laws of consequential fact

you show me when to (what you give is what you get) you show me how to respond (what you give is what you get) you show me whe n to react (what you give is what you get) you show me when (wh at you give is what you get)

the image that remains in view is one of isolation in a crowded room surgeons note they could remove but that would leave me l eft with just an open wound you find myself receding through my own vacuum

the way some people demostrate intentions tend to precede choic es that we make the way some people operate they spend their ti me promoting counterfeit thats fake they'll try to sell you bre ad when baby it's half baked
