

# Mankind

## Cast

When you start to find, start to see the signs  
Read between the lines  
Then you start to learn, wheels start to turn  
Like fire burns

I tried to show you but you could not see me  
I tried to tell you but you could not hear me, no So I just let  
go

Then you realise all can't be defined  
The questions in your mind  
Then you open wide and see what's yet to come  
Now it's only just begun

I tried to signal but you do not receive me  
I tried the truth but you will not believe me, no  
So I just let go

Cause I can see the things I need to see  
Come alive with energy  
And I'm a big believer in mankind  
Watch the world revolving through my eyes  
Watch the world evolving in my mind

When you start to learn, wheels start to turn  
Fire burns  
Then you open wide, see what's yet to come  
And now it's only just begun

I tried to touch but I could not reach you  
You hear the prayer but will you be preached to, no?  
Watch the world revolving through my eyes  
See the world evolving in my mind  
And the world turns round and round  
To the music and the sound  
Hear the world responding to our cry
