## **Vampire Sun**

Cathedral

Skull of god with the devils eyes Crowned in fire sodden sky Beaming rays of genocide Into virtues magic lie

Illusive myth of light enslaves you Vampire sun it drains you

Beg the sword for liberty
Fall before the king of flies
Delirium is flowing free
In our obedience disease

The gift of life is reaped of value Vampire sun it drains you

Gaze into the face of fire Dreams descend into the pyre

Monolithic angel Unveil your king to this planet disabled Mummify the cosmos With the vision of divinity yeah!

Electric vulture flying high Through the universal eye To cleanse the heavens with earth soul The excretion of mankind

Feeding from the fangs of virtue Vampire sun it drains you

Gaze into the face of fire Dreams descent into the pyre
