

Cannibalistic Invasivorism

Cattle Decapitation

As populations explode
Sustainability and all hope will erode - its time we reset the
clock before the hourglass implodes on itself and on us,
It's on us to adjust ourselves

It's time... to dine... on mankind

An invasive species corrupting entirely
"Humanity", "a civilized society", oh the irony
Self-righteous organisms salivating at the thought of slavery
Permeating, enslaving with audacious depravity

To recondition our eco-systems
To reposition - man is now the victim

Cannibalistic invasivorism
An indigenous reclamation

Through violence
Through hate
Through inhumanity
Au naturale

It's time... we die... for the love of life

An unnatural practice, to restore balance, to combat the malice
Introduced by man
Thinning the herders, culinary murder
Eco-crusaders, eating the invaders

To recondition our eco-systems
To reposition - man is now the victim

Through violence
Through hate
Through inhumanity
Au naturale
