

Walking With The Sun

Charlie Simpson

Open up your eyes, there is nowhere left for us to hide
Get the feeling that we've lost these ends of time
And there in no disguises
Walking with the Sun, we are nothing but strangers to this land
Yet we keep it in our hearts until we can
Live this way again

Can we just follow the sun?
Take it back to where this all began
Cause we're out here on our own
It's the only road we've ever known
Give it

Just give it
Just give it back
Give it
Just give it back to us

Take it as it comes
As it passes from a Mother to a Son
I just hope we're not the only ones
To leave this all behind

Can we just follow the sun?
Take it back to where this all began
Cause we're out here on our own
It's the only road we've ever known
Give it

Just give it
Just give it back
Give it
Just give it back to us

Can we just follow the sun?
Take it back to where this all began
Cause we're out here on our own
It's the only road we've ever known
Give it

Just give it
Just give it back
Give it
Just give it back to us

Give it back to us
