

Call You Up

Charlie Worsham

It's not that I don't ever wonder
How you've been, who's roof you've been under
Like it never crossed my mind
Happens every day

Yeah when the dog barks, when the phone rings
When the rain falls on the Porsche that we saved up for
When it don't hurt anymore

I'm gonna call you up
Ask you how you doin' and how you been livin'
Laugh about the good old days and the way that you read my heart
Just to say what's up
I thought about you out of the blue
I'm gonna call you up
If I ever get over you

If I ever get good for a minute
Dream a dream without you in it
Hear a slow song without seein' you dancin' on the floor
Maybe if I was holdin' someone else tight
I'd be doin' alright
Maybe one of those nights

I'm gonna call you up
Ask you how you doin' and how you been livin'
Laugh about the good old days and the way that you read my heart
Just to say what's up
I thought about you out of the blue
I'm gonna call you up
If I ever get over you

Oh, I'm gonna call you up
Ask you how you doin' and how you been livin'
Laugh about the good old days and the way that you read my heart
Just to say what's up
I thought about you out of the blue
I'm gonna call you up
If I ever get over you
If I ever get over you
If I ever get over you
If I ever get over you
