

## Only Way to Fly

Charlie Worsham

That boy is baggage, draggin' you down  
Shoulda left him in the lost and found  
Solo so long, you're lonely now

You're jonesing for a piece of open sky  
A little bit of runway shy  
It's high time you kissed gravity goodbye

By the seat of your blue jeans  
On the wings of a big dream  
Leavin' them smoke rings and the clouds behind  
Your co-pilot is your heart of gold  
Watch the world disappear below  
Come on baby, don't you know?  
Oh, that's the only way to fly

A leap of faith and gonna launch yourself  
Pick a star right off the shelf  
You'll be over the moon by sunrise

A tailwind and a little grace  
Will get you all the way to outer space  
So mission control it's T-minus ten, nine, eight

By the seat of your blue jeans  
On the wings of a big dream  
Leavin' them smoke rings and the clouds behind  
Your co-pilot is your heart of gold  
Watch the world disappear below  
Come on baby, don't you know?  
Oh, that's the only way to fly

By the seat of your blue jeans  
On the wings of a big dream  
Leavin' them smoke rings and the clouds behind  
Your co-pilot is your heart of gold  
Watch the world disappear below  
Come on baby, don't you know?  
Yeah, that's the only way to fly  
Yeah, that's the only way to fly, fly, fly, yeah
