

Stand and Fight

Chastain

Over in time I see our malignant foe
Their distance beckons forever it grows
Laying down edicts against the will of man
Destruction calls us this we understand

Rise to the challenge remember who we are
Stand up and fight knowing truth's not that far

Majestic armies lay before our fields
This we will battle we shall never yield
Centuries may pass, centuries may cry
Passions of war that will never die
That shall never die

Rise to the challenge remember who we are
Stand up and fight knowing truth's not that far

We are the last of our own kind
If we shall lose we will be lost in time

We must prevail for flesh and blood
Our enemies must be left far behind

Rise to the challenge remember who we are
Stand up and fight knowing truth's is never far

Stand and Fight
Stand and Fight

In the morning, at true midnight
That's when we'll strike with our full force
Never to weaken, never off course
Finally!!!!!!!!!!!!!!

Rise to the challenge remember who we are
Stand up and fight knowing truths is never far

Take us to the fight, we'll stand up for the night
We may not live, but we'll win the war
Change is on the way, for they've had their day
Stand up and fight as before!!!!!!

Stand and fight
Stand and fight
