

Don't Look Down

Chicane

Don't look down, just hear me say,
From here to now, from now to here, in every way
Don't look down, don't run away
From here to now, from now to here, in every way

From here to now, from now to here, in every way
From here to now, from now to here, in every way
From here to now, from now to here, in every way

Don't look down, just hear me say,
From here to now, from now to here, in every way
Don't look down, don't run away
From here to now, from now to here, in every way

Don't look down, just hear me say,
From here to now, from now to here, in every way
Don't look down, don't run away
From here to now, from now to here, in every way

From here to now, from now to here, in every way
From here to now, from now to here, in every way
From here to now, from now to here, in every way
From here to now, from now to here, in every way
