Like love on the run there will be tomorrows The stars and the sun every beam I'll follow Together we're dancing all night long Together we're dancing on and on

The sound of the drum keeps my soul depending Each day and each night and it's never ending Together we're dancing all night long Together we're dancing on and on

Like love on the run there will be tomorrows The stars and the sun every beam I'll follow Together we're dancing all night long Together we're dancing on and on

The sound of the drum keeps my soul depending Each day and each night and its never ending Together we're dancing all night long Together we're dancing on and on and on

The sun
'Cause I believe now and then
If you could look into the sun again
Cause I believe now and then

On the run On the run

On the run On the run

Like love on the run there will be tomorrows The stars and the sun every beam I'll follow Together we're dancing all night long Together we're dancing on and on

The sound of the drum keeps my soul depending Each day and each night and its never ending Together we're dancing all night long Together we're dancing on and on

Like love on the run there will be tomorrows The stars and the sun every beam I'll follow Together we're dancing all night long Together we're dancing on and on and on
