## **Now Or Never**

And if I let you go I think we'll never know And then you said to me "It's really now or never"

And if I let you go I think we'll never know And then you said to me "It's really now or never"

And if I let you go I think we'll never know And then you said to me "It's really now or never"

And if I let you go I think we'll never know And the dream away And then you said to me "It's really now or never"

And if I let you go I think we'll never know And then you said to me "It's really now or never"

And if I let you go I think we'll never know And then you said to me "It's really now or never"

And if I let you go I think we'll never know And the dream away And then you said to me "It's really now or never"

And if I let you go I think we'll never know And then you said to me "It's really now or never"

And if I let you go I think we'll never know And the dream away And then you said to me "It's really now or never"

And if I let you go I think we'll never know And then you said to me "It's really now or never"
