

North Star

Chris Mann

Lost in a vast ocean
Hope sinking like a storm
And the fate broken
By fading thoughts of our own
When night is all we see
know that I will never leave

Cause through every season
Through all the years
When the water is calm
And the waves are the storm
I will be here

When you start believing
That you're lost in the dark
Where [?] out of reach
Know that I'll be your North star

I will be where you are
When low tides start to arise
I will shield your heart
The way you guarded mine
When loves pull out to sea
Know that I will never leave

Cause through every season
Through all the years
When the water is calm
And the waves are the storm
I will be here

When you start believing
That you're lost in the dark
Where [?] out of reach
Know that I'll be your North star
Be your North star
I'll be shining till you find me
I'll keep shining on

Cause through every season
Through all the years
When the water is calm
And the waves are the storm
I will be here

When you start believing
That you're lost in the dark
Where [?] out of reach
Know that I'll be your North star
So just hold on to me
Know that I'll be your North star
