

Rain Like This

Chris Mann

We held each other when the sky was grey
And when the thunder and the lightning came
We promise not to let the darkest days
Come again

We always found a way to make it through
The times it seem like we would break in two
But now the clouds are kept away from you
Are coming in

We never seen rain like this
Never been a storm so strong
We never thought we let these winds
Keep us on the ground so low
That I'll never go run and hide
I'll never leave you in the cold
And it never even cross my mind
Cause we can make it even though
We never seen rain like this

We made love underneath the summer storm
We been locked out when it began to pour
But now there's something other than before
Coming in

We never seen rain like this
Never been a storm so strong
We never thought we let these winds
Keep us on the ground so low
That I'll never go run and hide
I'll never leave you in the cold
And it never even cross my mind
Cause we can make it even though

Even though the sky is falling down
You and I will never let us drown
Never seen rain like this
Rain like this
We never seen rain like this
Never been a storm so strong
We never thought we let these winds
Keep us on the ground so low
That I'll never go run and hide
I'll never leave you in the cold
And it never even cross my mind
Cause we can make it even though

We never seen rain like this
