

# All Alone

Chris Norman

All alone I wandered through this town  
It feels so far from home  
All alone this feeling gets me down  
My heart is not my own we've come too far

Everyday I wake and think of you  
Wishing you were here  
'Cos only you can thrill me like you do  
I need to feel you near inside my arms

Oh you and me we fit together perfectly  
And all I wanna do tonight is feel you loving me

My heart and me we think about you day and night  
And if loving you this much is wrong  
Why does it feel so right

All alone I wonder where you are  
And what you're doing now  
All alone I play on my guitar  
And try to write it down this way I feel  
All alone, all alone
