

Babe

Chris Norman

An angel said goodbye now and darkness lies ahead
My heart just seems to cry out all the words we left unsaid
But in my soul I'll hold you forever

Feel me, babe, I need you here
Just by my side to ease my fear
And with you babe I could survive

I'm tortured by my feelings, just you can heal the pain
Don't want to go on stealing the forbidden fruits again
We gotta keep the magic together

Feel me, babe, I need you here
Just by my side to ease my fear
And with you babe I could survive
But careless love has turned off the light in our life
Oh, babe

Babe, I need you here
Just by my side to ease my fear
And with you babe I could survive
But careless love has turned off the light in our life
Oh, babe

The light of my life, oh babe...
