

Catch Your Dream

Chris Norman

Remember when we were so young and free
We could be anything we want to be
What would it mean,
if you could catch your dream
Catch your dream

And if your heart is breaking and you're all alone
And your hopes are sinking just like a stone
Like a light that's shining I'll see you through
You know I'll always be there for you
And how can we go wrong
With our dreams to make us strong

Remember when we were so young and free
We could be anything we want to be
What would it mean,
if you could catch your dream
And if everything we dreamed came true
I know I'd spend my life with you
What would it mean,
if you could catch your dream
La, la, la, la

When your chasing those rainbows
Don't give up cos god knows
It's there in your heart, if you want it enough

Remember when we were so young and free
We could be anything we want to be
What would it mean,
if you could catch your dream
And if everything we dreamed came true
I know I'd spend my life with you
What would it mean,
if you could catch your dream
La, la, la, la catch your dream ...
La, la, la, la catch your dream ...
