

One Night Stand

Chris Norman

In New York City where the girls are pretty
And it's hard to find your way home
She was stood in the room I had to assume
She didn't need a chaperone
And the music played we danced all the night
Her body swayed as she held me tight
And when she looked that way I wanted her so bad

But she'll get off and use a man
And then dismiss him with a wave of her hand
It took so long to understand
I'm just another victim of a one night stand
I'm just another victim of a one night stand

High class baby well you drive me crazy
And I'd like to know what's on your mind
Take you to my room it's safe to assume
I'll get my motor re-aligned
'Cos I'm old enough to face the facts
Let your body move and your soul relax
Now I think I know what you wanna do

'Cos you get off and use a man
And then dismiss him with a wave of your hand
It took so long to understand
Just another victim of a one night stand
Just another victim of a one night stand

'Cos you get off and use a man
And then dismiss him with a wave of your hand
It took so long to understand
Just another victim of a one night stand

'Cos you get off and use a man
And then dismiss him with a wave of your hand
It took so long to understand
Just another victim of a one night stand
Just another victim of a one night stand
Just another victim of a one night stand
