

Firefly

Chris Rea

Go to that secret place
Inside your soul
Go to its deepest place
Only you and I know

Can you see her?

There she is still shining bright
When the sun goes down
See her crimson glow
Through the darkest of nights

She smiles and says
"Everything is alright
There will never be goodbye
While we still see the firefly"

The firefly, the firefly
The firefly, the firefly
The firefly, the firefly
The firefly

She smiles and says
"Everything is alright
There will never be goodbye
While we still see the firefly"

The firefly, the firefly
The firefly

There will never be goodbye
There will never be goodbye
While we still see the firefly
There will never be goodbye
While we still see the firefly

There will never be goodbye
While we still see the firefly
There will never be goodbye
While we still see the firefly

There will never be goodbye
While we still see the firefly
There will never be goodbye
While we still see the firefly
There will never be goodbye
