

## Every Second

Chris Travis

I can never slack, boy I'm 'bout my racks  
Always on my grizzly, till the day I rest  
Chop you like dissect, split like a bet  
Do not mind my set, there minds out their head  
They're like the breathin' dead, see I am never scared  
I like to get my meds, then fall out in her bed  
This money like a virus, cause this shit just gon' spread  
If you think that you better, I wanna see your best  
I can't stay at one level, that shit is just not me  
All I know is growth, all I take is leads  
You rappers centipedes, step right on your head  
All I get is blessings, don't think this shit is lucky  
If anything I'll stretch it, I'm movin' and I'm restless  
My dreams I'm fuckin' catching, be there at every second

I be there every second, can't talk but take a message  
I be there every second, can't talk but take a message
