

Everything You Said

Chris Travis

Every night I stay up getting high
'Til the point where my body is falling asleep
Gotta catch up on my eyes
I can't show you I'm struggling, sick of counting sheep
Even days when I'm feeling down, low
I don't let the blunt hit the ground, no
WaterSesh bumping louder than a trumpet
Think they didn't know us but now they know
Now in a crowd, there is nowhere to go
Turned an empty room into a sold-out show
Now they bring us up like 'Oh, I know'
They got it, all they wanted, did it all alone

I see you from a far
Girl, you've been in my heart
I don't know where to start
I just caught on so sharp
I look you in your eye
These days are so strange
I just need you to be there
Need to know that you care

WaterSesh

Every little thing you said
Spinning in my head
Every little thing you said
Spinning in my head

I'm just rolling through, not patrolling you
Couple waves ahead, I might be over you
Say I'm overdue, can't feel overused
She was with me at that moment so she's posted too
On my side at the time I was still a troop
Breaking rules on the move but I never removed
These days I can say give me 10 or 2
I play to win, I lose
I get in, I snooze

Every little thing you said
Spinning in my head
Every little thing you said
Spinning in my head
